NEW ZEALAND RESOURCE CENTRE • COMPANION CHECKLIST

MRTB Registration Checklist

A practical, tickable checklist to work through alongside your Medical Radiation Technologists Board Registration Guide — so nothing gets missed on the way to registration.

Before you begin

Tick as you go

Tick each box on screen as you complete it. The items are grouped into stages, roughly in the order you'll tackle them — but you can work on several at once. This checklist is a companion to the main guide, which explains the *why* behind each step. It complements, and does not replace, the official guidance of the Medical Radiation Technologists Board, who make all registration decisions.

01 Before you start

Get oriented before you spend money or gather documents.

- ☐ **Confirm which MRTB scope of practice you're applying for**
Medical Imaging Technologist, Sonographer, Nuclear Medicine Technologist, Radiation Therapist (mammography sits within the MIT scope)
- ☐ **Complete the MRTB online eligibility check**
On the Board's website, before you begin a full application
- ☐ **Understand your likely pathway**
Whether a supervised period or examination may apply — Sonographers and MRI Technologists more often face full assessment
- ☐ **Check your qualification level**
The NZ benchmark is a bachelor's-level qualification (NZQF Level 7 equivalent)
- ☐ **Note the current fees**
Check the Board's live fees notice — figures change periodically

02 Identity & personal documents

The foundations every application needs.

- ☐ **Passport**
Valid, not close to expiry; full colour scan of the photo page, all edges visible
- ☐ **Name change document(s)**
Marriage certificate, deed poll or equivalent — only if your name differs across documents
- ☐ **Consistent name across all documents**
Check every document carries the same name before you submit

03 Qualifications & training

Evidence of what you trained to do.

- ☐ **Qualification certificate(s)**
Certified copies of your degree/diploma for the relevant scope
- ☐ **Academic transcripts**
Showing course content, modules and clinical placement hours
- ☐ **Course outline or syllabus**
Optional — helpful if your transcript is light on clinical detail
- ☐ **Certified copies prepared correctly**
Confirm who is permitted to certify and the exact wording required
- ☐ **Translations (if applicable)**
Independent, certified translation of any non-English documents

04 Experience & references

Proof your skills are current.

- ☐ **Up-to-date CV**
Complete employment history with every period accounted for, no unexplained gaps
- ☐ **Employment history compiled**
Dates and hours consistent with the rest of your application
- ☐ **Identify suitable referees**
Choose people who directly supervised your clinical work — not just senior names
- ☐ **Brief your referees**
Explain it's for NZ registration; share scope, and the detail the Board values
- ☐ **Strong clinical references obtained**
On letterhead, signed, dated, with scope, dates, competence and contact details
- ☐ **Ethicare reference review (optional)**
We can review references before submission and flag likely issues

05 Good standing & background

Confirmation you're in good professional standing.

- ☐ **Certificate(s) of Good Standing requested**
From every regulator you've registered with — sent directly to the MRTB
- ☐ **Good Standing timing checked**
These expire — time them to arrive when your application is ready, not months early
- ☐ **Criminal history / police checks**
For every country lived in 12+ months since age 16, via the Board's specified provider
- ☐ **Checks sent directly to the Board**
From the issuing authority, not forwarded by you

06 English language

Evidence you can communicate safely in clinical practice.

- ☐ **Confirm which English pathway applies to you**
Test, English-medium education evidence, or senior-referee route
- ☐ **Sit IELTS (Academic) or OET if required**
Meet the minimum in every component, not just overall
- ☐ **Check test validity dates**
Results expire (typically ~2 years) — time your test so it's still valid at assessment

07 Submitting your application

Putting it all together — cleanly.

- ☐ **Create your application on the Board's portal**
Work through each section carefully and accurately
- ☐ **Upload documents as clean colour scans**
Straight, square, nothing cut off, clearly named — present it like a portfolio
- ☐ **Pay the applicable fees**
Keep your payment confirmation
- ☐ **Final check against requirements**
Could a stranger find everything they need without emailing you?
- ☐ **Submit**

08 After you submit

Keep things moving to your decision.

- ☐ **Watch for Board communication**
Check email (including spam) and your portal regularly
- ☐ **Respond to any information requests promptly**
Speed of response is the biggest factor within your control
- ☐ **Complete any supervised practice / examination if required**
A normal part of the pathway for many international applicants
- ☐ **Registration confirmed**
- ☐ **Apply for your Annual Practising Certificate (APC)**
Required before you can practise — APC costs reimbursed in an Ethicare package

HOW ETHICARE WILL SUPPORT YOU

You don't have to do this alone

If anything on this checklist raises a question, that's exactly what we're here for. We support and guide you through every stage — from first enquiry to starting work. The registration decision always rests with the Medical Radiation Technologists Board.
