AUSTRALIA RESOURCE CENTRE · COMPANION CHECKLIST

Nuclear Medicine Technologist Registration Checklist

A practical, tickable checklist to work through alongside your Nuclear Medicine Technologist Registration Guide.

Before you begin

Tick as you go

Tick each box on screen as you complete it. The items are grouped into stages, roughly in the order you'll tackle them — but you can work on several at once.

This checklist is a companion to the main guide, which explains the *why* behind each step. It complements, and does not replace, the official guidance of the Medical Radiation Practice Board of Australia, who make all registration decisions.

One thing to know up front

Two separate processes run here: **MRPBA registration** (what lets you practise) and a **migration skills assessment** (for nuclear medicine technologists, carried out by ANZSNM — not ASMIRT — and tied to certain visas). Lead with registration; the skills assessment, where a visa needs it, comes afterwards. On an employer-sponsored 482, a skills assessment generally isn't required just to register — confirm your visa route with your employer.

01 Understand the two processes

Get this clear before anything else — it saves time and money.

- ☐ **Know registration vs migration are separate**
MRPBA registration lets you practise; the skills assessment is a migration step
- ☐ **Confirm MRPBA registration is your priority**
It's what allows you to work in Australia
- ☐ **Note the assessor for nuclear medicine is ANZSNM**
Not ASMIRT — and registration comes before the skills assessment
- ☐ **Identify your visa route**
Employer-sponsored 482, or points-tested skilled migration (189/190/491)

02 Check if your qualification is recognised

For nuclear medicine, individual assessment is the usual route.

- ☐ **Use the Board's 'Is my qualification recognised?' page**
It may already recognise your qualification
- ☐ **Check the recognised-qualifications list**
Short and specific for nuclear medicine — must match institution, title and award year
- ☐ **Note HCPC/CORU lists don't cover nuclear medicine**
The UK/Ireland fast lane is for radiographers and radiation therapists
- ☐ **Plan for an individual assessment**
Or the CAMRT / NZMRTB exam route if you hold a relevant division qualification

03 Qualification assessment (if required)

What the Board weighs if it assesses your qualification.

- ☐ **Educational level — AQF level 7**
Comparable, at minimum, to an Australian Bachelor degree
- ☐ **Quality assurance & accreditation evidence**
Externally accredited programme against published standards
- ☐ **Core nuclear-medicine competencies covered**
Radiopharmacy & radiation safety, SPECT/CT & PET/CT, clinical practice
- ☐ **Note any exam or supervised-practice requirement**
An assessment outcome may direct you to the national exam or supervision

04 English language

Only if it applies to you under the standard.

- ☐ **Meet the English Language Skills Registration Standard**
Confirm current accepted tests/exemptions on the Board's standard
- ☐ **Provide an approved test result (if no exemption)**
e.g. where required by the standard
- ☐ **Results valid at submission**
Time the test so it doesn't expire before you apply

05 National MRP examination (if required)

Depends on your assessment outcome — not everyone sits it.

- ☐ **Confirm whether the exam applies to you**
Determined by your qualification assessment outcome
- ☐ **Note the format and timing if required**
Held several times a year, computer-based
- ☐ **Prepare for Australian-context content**
Radiation safety legislation, professional capabilities, cultural safety

06 Supporting documents

A clean, certified pack is the biggest factor within your control.

- ☐ **Passport & certified proof of identity**
Plus certified evidence of any name change
- ☐ **Degree certificate & full academic transcript**
Subjects, results and grading system
- ☐ **Clinical placement / supervised-practice evidence**
Where required for your assessment
- ☐ **Registration history & Certificate of Good Standing**
From each authority you're registered with, current
- ☐ **Employment history & up-to-date CV**
Roles, dates and responsibilities
- ☐ **Certified translations of non-English documents**
Supplied with the certified original

07 Apply to Ahpra / MRPBA

Submitting your registration application.

- ☐ **Complete the application form**
Select the nuclear medicine technologist division
- ☐ **Pay the application/registration fee**
Non-refundable — confirm current figures on the Board's fees page
- ☐ **Submit a complete, well-organised pack**
Certified copies, clear scans, consistent naming
- ☐ **Respond promptly to any Board queries**
Incomplete applications are the most common cause of delay

08 Register, license & start

The final steps to practising.

- ☐ **Registration granted by the MRPBA**
You're cleared to practise once registered
- ☐ **Obtain your state radiation-use licence**
Required to handle unsealed radioactive materials / operate equipment
- ☐ **Secure your role & confirm sponsorship**
Many AU employers expect registration to be in place first
- ☐ **Don't make irreversible moves too early**
Wait until your registration eligibility is confirmed

HOW ETHICARE WILL SUPPORT YOU

You don't have to navigate this alone

If anything on this checklist raises a question, that's exactly what we're here for. We support and guide you through every stage — from first enquiry to starting work. The registration decision always rests with the Medical Radiation Practice Board of Australia.
